

INVITATION TO TENDER
Construction Works - Open Procedure
Climate Resilience in the Water Sector of Kosovo: Seed Investment
Supply and Installation of Water Metering Systems

Publication date: 21.09.2026

Subject of the Contract

The Subject of the Contract is supply, installation and related civil works for customer and bulk flow water meters in existing supply networks operated by the participating Regional Water Companies. The Works include, but are not limited to:

- Bulk (production/distribution) flow metering: installation of two electromagnetic flow meters on main distribution pipelines in Ferizaj (RWC Bifurkacioni).
- Customer metering: relocation and replacement of customer water meters in prefabricated chambers to public space for all 479 service connections in Pasjan village, Gjilan Municipality (RWC Hidromorava).
- Smart customer and zonal metering: digitalization and smart monitoring of a DMA in Dardania neighborhood in Prizren (RWC Hidroregjioni Jugor) through replacement of approximately 550 existing mechanical customer meters with smart meters, installation of three ultrasonic flow meters for the DMA Dardania, and five pressure sensors, communication devices and software platform for real-time monitoring and analysis.

For financing purposes, the investments are divided into:

Component A (Government of Kosovo / Ministry of Economy financed):

- Bulk flow metering - RWC Bifurkacioni
- Customer water metering - RWC Hidromorava

Component B (SECO financed):

- Smart metering and DMA monitoring - RWC Hidroregjioni Jugor

This Contract includes design, supply, delivery, installation, testing, commissioning and handover of all necessary Works and Services for the installation and digital integration of the water meters, pressure sensors, telemetry equipment and related monitoring systems.

Place and Period of Contract Performance

Place of performance: Kosovo

The two installation points of the bulk flow meters, including chambers, for RWC Bifurkacioni (Ferizaj) are on the distribution system downstream of Pleshinë Water Treatment Plant and reservoir.

The location for the Works and Services for RWC Hidromorava (Gjilan) is the 479 service connections in Pasjan village in the municipality of Gjilan.

The Works and Services will be implemented in Dardania neighborhood in the city of Prizren, within the service area of RWC Hidroregjioni Jugor.

Implementation period: 23.11.2026 - 28.05.2027

Contract duration: Not specified. This contract may be extended.

Eligibility and Award Criteria

Eligibility criteria, participation conditions and award criteria are specified in the Tender Documentation.

Item	Details
Main CPV	45232150 - Works related to water-distribution pipelines
Sector	Water supply
Category	Civil engineering
Type of works	Planning and execution

Key Dates

Offers received after the submission deadline will be returned unopened to the Tenderer.

Item	Date / Deadline
Tender documentation availability	21.09.2026 - 23.10.2026
Deadline for submission of questions	09.10.2026
Tender submission deadline	23.10.2026, 10:00 CET
Tender validity	180 days after the submission deadline

Pre Tender Site Visits

Tenderers are encouraged to attend the pre-tender site visits and familiarize themselves with local conditions at the respective sites. The tendering schedule is set out in section 10.1 of the Instructions to Tenderers.

Date	Site
05.10.2026	Pleshinë, Ferizaj - bulk flow meter installation points
05.10.2026	Pasjan, Gjilan - customer metering service connections
06.10.2026	DMA Dardania, Prizren - smart metering and DMA monitoring

Additional Information

Questions: Any questions regarding the Tender Documentation should be submitted in writing to arbnor.hoxha@rks-gov.net. The round of questions will be carried out outside of simap.ch.

Tender documents: The Tender Documentation is available in English and can be downloaded through **simap.ch**. Registration and login as a user are required to download the documents.

Public opening of tenders: No
